A BIT ABOUT ME...

- I have had many interesting careers over the years and I though this might be an interesting way to explain my experiences. Starting first as an EMT right out of high school I worked on an ALS truck partnered with a paramedic. At the same time, I was a Paid Patroller at a small ski area in Eastern Pa about an hour north of Philadelphia. In 2001 I attended a local Police Academy with the hopes of landing a job once I graduated. That didn't happen right away so I got a job as a Loss Prevention Officer with a grocery chain called Wegmans. I traveled around to various stores providing Loss Prevention techniques to employees. About a year later I landed a part-time job as a Municipal Police Office in a small borough with only two traffic lights in the town. A year or so later I got offered a full-time position as a Police Office. I was with that Department for almost 8 years where I held several different assignments including Drug Task Force/Investigator, Community Police Office, and Patrolman. I soon realized a career as a Police Officer wasn't for me and left the Department to operate a Lawn and Tree Care Company. I owned and operated my company for 7 years growing it into something I could barely handle. I then was offered the position at Killington in 2015 as Risk Manager which eventually morphed into Risk and Insurance Manager. My wife and I met patrolling in PA where we married in 2010. We both patrol at Killington while raising two crazy boys- Jonah 3, and Jamie 1.
